

# MES COLLEGE OF ARTS, COMMERCE & SCIENCE

NAAC Accredited with Grade “A”

‘Vidyasagara’ Prof MPL Sastry Rd, 15th Cross, Malleswaram, Bangalore -03

ACADEMIC YEAR 2022-23

## Institutional Distinctiveness

### **Fostering social responsibility**

In a Higher Educational Institute (HEI), the trinity – teaching, research and service, are required to co-exist for socio-economic development of the country. By connecting to the community, HEIs can reinforce the values of social responsibility amongst the youth. In this regard, our institution offers a number of platforms to students in order to engage in the activities that make them aware of their responsibilities to the society. The institution has MoU with Lion’s Club w.e.f 19.06.2023 to facilitate the implementation of these activities.

The faculty take their students to old age homes, orphanages and government schools to help them understand their challenges and feel compassion towards them. Another initiative is the amount collected from activities like ice-breaking session by NSS and Business & Bestowal, is given as charity to the needy organizations. The institution donates computers to the government schools in its vicinity. The institution extends support by lending the premises for social causes especially for Non Government Organizations.

Our endeavours are through following extension units and cells operational in the institution:

- NSS – National Service Scheme

- NCC – National Cadet Corps
- MES Rotaract Club
- Youth Red Cross
- Rangers and Rovers
- Electoral Literacy Cell
- Legal Awareness Cell

Activities performed through these units :

1. Blood donation camps
2. Service Camps
3. Plantation drive
4. Cleanliness drives
5. Awareness rallies and campaigns
6. Visit to orphanages and old age homes

Many Departments also send the students to old age home, orphanages, government schools etc.

Other initiatives taken by the institution to extend its responsibility towards the society is to help make this earth a better place to live for everyone:

- Proper disposal of hazardous and electronic waste
- Rain water harvesting
- Installing Solar lights
